1 App Info

Tentative Title:	Basketball VR

	Education & Training		Mental Health & Fitness
	Travel & Discovery		Media & Entertainment
	Productivity & Collaboration	✓	Gaming
	Art & Creativity		Other: _____

2 Pitch

To goal is for users to play:

A simple basketball game in VR

This will be especially effective in VR b/c:

The user will be able to play basketball anywhere, in a virtual environment

At a high level, during the app, users will:

be able to grab a basketball ball and throw it toward the hoop.

This experience will be targeted at devices with:

6	degrees of freedom, giving users control over the	movement & rotation	of their head & controllers.

3 Basics

The app will take place in:

A basketball court

and the user will get around the scene with:

N|A	movement.

The user will be able to grab:

- The ball
-
-

There will not be sockets.

-
-
-

4 Events & Interaction

There will be haptic / audio feedback when:

- The ball bounces
- The ball hits the backboard

There will also be 3D sound from:

-
-

By default, the left hand will have a:

Direct	interactor.

and the right hand will have a:

Direct	interactor.

And you will not be able to toggle on a Ray interactor.

[Optional] There will be additional UI elements for:

- Respawning the ball in front of the player
-

5 Optimization & Publishing

To make the user experience more accessible / comfortable:

-
-
-

Given that this app is targeting the Meta Quest 2, target metrics are:

Frames per second:	>= 72	FPS

Lighting strategy:

	All baked	✓	Mostly baked with some mixed		All real-time

Light probes will not also be used for more realistic mixed lighting.
